

AI TOOLS THAT WORK

Sort It Out

Three messy plans turned into clear ones: a group chat, a voice note and a Saturday schedule.

Tested October 4, 2026

Why this guide

Plans live in strange places: a group chat that goes in circles, a voice note full of "um", a head full of chores. I gave three of these to an AI chat and asked for a clear plan. Then I checked every line, because a plan that looks tidy can still be wrong.

Where the text leaves something open, the AI should say "Not decided" and not fill it in.

The steps

1. Paste the mess and say what shape you want back.
2. Say what to do with gaps: "Not decided".
3. Check the plan against the original, line by line.

Every message here is made up for practice. The AI answers are real.

How I tested

I used a free public chat demo, with no account and no payment: the Qwen3 demo on Hugging Face

(huggingface.co/spaces/Qwen/Qwen3-Demo), model shown as Qwen3-235B-A22B.

I ran three chats on October 4, 2026, between 4:31 and 4:33 AM Saudi time, each in a new chat. One run each, so another run can answer differently. I made up the messy texts, so no real people or private data are involved.

Keep it private. This is a public demo. For real plans, use placeholders instead of names, addresses or account numbers.

EXAMPLE 1

The picnic chat

Five people, nine messages, and nobody wrote down who does what.

Dina: ok picnic is saturday at the lake, I can bring sandwiches

Omar: I'll book the pavilion tomorrow, it costs 40 dollars I think

Layla: can someone get ice?

Dina: Omar you have the cooler right?

Omar: yes cooler is mine. ice I can do too if nobody else

Layla: I'll bring the folding chairs, there are 6

Tariq: I can bring a ball and the speaker. Not sure about time yet

Dina: lets say 2pm? Layla can you confirm?

Layla: 2pm works for me, but Tariq said maybe later

I asked three questions. The third is the trap: nobody said who brings drinks.

What the AI wrote

ANSWER, 11.9 SECONDS

Dina: brings sandwiches. Omar: books pavilion, brings cooler and ice. Layla: brings folding chairs. Tariq: brings ball and speaker.

Time: 2pm.

Drinks: Not decided.

What it got right

- Drinks: "Not decided". Right. It did not invent a drinks person.
- Everyone's job is in. Dina sandwiches, Layla the chairs, Tariq the ball and speaker.

What needed fixing

- It says the time is 2pm. In the chat, Dina suggests 2pm, Layla says it works, and Tariq says "maybe later". It is closer to "proposed" than "decided". Ask Tariq.
- Omar and the ice: Omar said he could do ice "if nobody else". Nobody else offered, so it is reasonable, but it is a conditional yes. Say so in your own list.
- It left out the pavilion cost (40 dollars "I think") and that booking happens "tomorrow".

EXAMPLE 2

The moving voice note

A voice note, typed out: Thursday, Friday, Saturday, plus things with no day at all.

ok so moving day is Friday, the truck is picked up at 9, I need to remember the truck. Thursday night I have to pack the kitchen, oh and cancel the internet, that can happen anytime really. Friday morning the keys go back to the landlord before noon. Um, also need to change my address, no idea when. Saturday I unpack the bedroom first. And buy a shower curtain, the new place doesnt have one.

I asked for a checklist by day, with a "No day given" group.

What the AI wrote

ANSWER, 11.6 SECONDS

Thursday

Pack the kitchen

Friday

Moving day

Truck pickup at 9:00 AM

Return keys to landlord before noon

Saturday

Unpack the bedroom first

Buy a shower curtain

No day given

Cancel the internet

What it got right

- The two no-day items (internet, address) are in "No day given". It did not guess a day.
- Friday has the 9 AM truck and keys before noon.
- "Unpack the bedroom first" and the shower curtain are Saturday.

What needed fixing

- "Cancel the internet" was said right after the Thursday task. The speaker said it can happen "anytime", so "No day given" is right. Still, a quick read can miss it.
- It added "Moving day" as a heading under Friday. That is the note's wording, but it is not a task. Delete it.
- It dropped "I need to remember the truck". The 9 AM pickup covers it, but always check that nothing else was lost.

EXAMPLE 3

The Saturday schedule

Five tasks and one lunch, between 9 and 5, with two timing rules. This one can be checked exactly.

Make a Saturday plan from 9 am to 5 pm. Tasks and durations: laundry 30 minutes (it must be started before 10 am), grocery shopping 60 minutes, call a friend 20 minutes (only after 2 pm), clean the bathroom 45 minutes, walk 40 minutes. Lunch is fixed from 12:30 to 1:15. Put no two tasks at the same time. Give a table-free list of start and end times, one per line. Plain text only.

The prompt is at the end of the guide.

What the AI wrote

ANSWER, 60.7 SECONDS

9:00 AM - 9:30 AM: Laundry

9:30 AM - 10:30 AM: Grocery Shopping

10:30 AM - 11:10 AM: Walk

11:10 AM - 11:55 AM: Clean Bathroom

12:30 PM - 1:15 PM: Lunch

2:00 PM - 2:20 PM: Call a Friend

What it got right

- I checked each rule by hand. Laundry starts at 9:00, before 10. Grocery shopping is 60 minutes, the walk 40, the bathroom 45, the call 20.
- The call is after 2 pm. Lunch is 12:30 to 1:15. No two tasks overlap.

What needed fixing

- It is a plan with no slack. Everything runs back to back, so one delay moves the rest. Ask for 10 minutes between tasks.
- It took about a minute to answer. That is slower than the other two. Here it was worth it.
- A correct plan on paper does not know your day. Laundry may need a second step. That is yours to add.

Lesson: when the answer has rules you can check, check them. It takes two minutes.

What I took from this

The facts were nearly all right. The risks were soft ones: a "maybe" turned into a fact, and a plan with no breathing room. Those are the lines to read twice.

1. Did it say "Not decided" where the text did not decide?
2. "Maybe" and "if nobody else" are not a yes.
3. Delete headings and filler that are not tasks.
4. Check times and counts yourself.
5. Ask for short breaks if the plan is tight.

The prompts

Copy these and change them. Put your own text where my made-up text is.

PROMPT 1: PICNIC CHAT

Below is a messy group chat for a made-up family picnic. Using only the chat, make a short list of who is doing what, one line each. If the chat does not decide something, write "Not decided". Plain text only.

CHAT:

Dina: ok picnic is saturday at the lake, I can bring sandwiches

Omar: I'll book the pavilion tomorrow, it costs 40 dollars I think

Layla: can someone get ice?

Dina: Omar you have the cooler right?

Omar: yes cooler is mine. ice I can do too if nobody else

Layla: I'll bring the folding chairs, there are 6

Tariq: I can bring a ball and the speaker. Not sure about time yet

Dina: lets say 2pm? Layla can you confirm?

Layla: 2pm works for me, but Tariq said maybe later

QUESTIONS:

1. Who does what?
2. What time is the picnic?
3. Who is bringing drinks?

PROMPT 2: MOVING VOICE NOTE

Below is a made-up voice note, typed out. Turn it into a checklist grouped by day. Use only what the note says. If a task has no day, put it under "No day given". Plain text only.

NOTE:

ok so moving day is Friday, the truck is picked up at 9, I need to remember the truck. Thursday night I have to pack the kitchen, oh and cancel the internet, that can happen anytime really. Friday morning the keys go back to the landlord before noon. Um, also need to change my address, no idea when. Saturday I unpack the bedroom first. And buy a shower curtain, the new place doesnt have one.

PROMPT 3: SATURDAY SCHEDULE

Make a Saturday plan from 9 am to 5 pm. Tasks and durations: laundry 30 minutes (it must be started before 10 am), grocery shopping 60 minutes, call a friend 20 minutes (only after 2 pm), clean the bathroom 45 minutes, walk 40 minutes. Lunch is fixed from 12:30 to 1:15. Put no two tasks at the same time. Give a table-free list of start and end times, one per line. Plain text only.

Limits and sources

- One public demo model, one day, one run per prompt. Another run or tool can answer differently, including wrongly.
- The chat, voice note and tasks are invented. No real people are described.
- I checked the schedule by hand against my own rules. I did not test on a phone.
